

X MARKS THE SPOT

Discover a rich history of GMP manufacture, CMC experience, and regulatory expertise.

Our integrated solutions

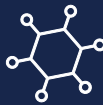

PROCESS & ANALYTICAL DEVELOPMENT

Microbial and mammalian expression systems.

RECOMBINANT PROTEINS

Microbial and mammalian expression systems for protein production, non-GMP/GMP quality.

VIRAL VECTORS & VACCINES

Virus and vector production up to biosafety level 3.

PLASMID DNA

Manufacturing of GMP plasmid DNA from mg to grams.

CELL THERAPY

Flexible state-of-the-art manufacturing operation for clinical and commercial applications.

EXTRACELLULAR VESICLES

Microbial and mammalian derived vesicles & engineered vesicle production strategies.

mRNA

Manufacturing *in vitro* transcription (IVT) up to 5L for non-GMP/GMP applications.

ASEPTIC FILL & FINISH

Robotic Gloveless Isolator (RGI) technology for clinical and commercial applications.

Beyond CDMO

We are more than a CDMO; we are pioneers and partners in the truest sense. At NorthX Biologics, we believe in embarking on a collaborative journey with our clients, navigating the complexities of biologics and growing along the way.

Our expertise within bioprocessing spans a variety of advanced modalities, including recombinant proteins, viral vaccines and cell therapy. Our team has been manufacturing biologics to GMP since 1992.

We are beyond the typical biologics CDMO, we are more. Let's journey together to turn visionary science into life-changing treatments.
